

We Rise by Lifting Others

OM ENTERPRISES VT

We Rise by
Lifting Others

About us

OM ENTERPRISES VT is manufacturer of Industrial Cranes having state of art manufacturing technology and facility. OM ENTERPRISES VT stands on a foundation built with close to 15 years experience of after sales service.

With a great pleasure to announce that a large manufacturing facility is a covered area of 25,000 sq. ft., making it one of crane manufacturing companies. We come out with the commitment that to provide a trouble-free crane ownership experience to all our customers.

Our commitment to customer service begins before we arrive on the job. Our employees are well trained industry professionals who bring to our team a dedication to providing the safest and most productive solutions to your hoisting project. Every member of our team is trained with a "can do" attitude to ensure that your project is completed on time, in the safest manner possible. Our project managers will assist you in selecting the right crane for the job, as well as make recommendations that will improve your overall productivity and safety requirements.

- **OM ENTERPRISES VT is a professional team after sales & services provider company.**
- **Established in 2008, with a young and Dynamic technical experts.**
- **Providing spares and services for all types of industrial cranes.**
- **Having rich experience, can provide well designed trouble free cranes for better productivity.**

Mission

We design cranes that meet your needs, not ours. Whether you need to increase safety, maximize production capacity or reliability, or reduce costs, we deliver.

Vision

No matter what load needs lifting, our extensive knowledge and capabilities across all types of crane solutions allows us to outfit your facility for maximum safety and efficiency.

Our Facility

Plasma Cutting

Our offered services have gained wide appreciation from our precious clients for their varied associated attributes like promptness, flawlessness and perfect execution. Services, offered by us are performed using the best grade tools and modern technology.

Sand Blasting

This service is executed by our skilled professionals using high grade tools and advanced technology. Our professionals check all the quality parameters associated to this service and perform the service in the best possible manner. We offer this service as per the requirements of our clients.

Spray Painting

Being a front runner in the industry, we are involved in providing our customers with highly qualitative Spray Painting Service. These provided services are offered in agreement with the defined guidelines to preserve our standing in the industry.

Magnetic Welding Trolley

Magnetic trolley is suitable to weld horizontal fillet joint. Welding magnetic trolley equipment can automatically seam track to horizontal fillet joint with guide arm & roller. Operator can start & stop the carriage travelling & welding by push button.

Products

Overhead Cranes - DG/SG

We provide an extensive range of cranes, for light duty applications and demanding processes. Our standard offering with high quality basic equipment or advanced offering with high-tech features is usually enough; but if it isn't, we can also provide a tailor-made solution for your processes.

Under Slung Cranes

We offer Underslung Cranes with compact design and lightweight making it easy to operate. Quite similar to EOT Cranes these also come with similar variation in them such as single or dual disc electromagnetic brakes feature that provide the automatic braking in case of sudden power failure occurs at location, various types of limit switches and push button station options are available.

Goliath Cranes

We design and manufacture goliath cranes as per our customer requirement for various industrial applications like shipping, construction, power, material handling, water gate handling, etc. Depending on the capacity & application, we design these cranes as single girder or double girder and also as per the requirements of our customers. One of the most important variables in the productivity of a shipyard is the size and completeness of the blocks that make up the hull. When a big hull block needs lifting, it's time for the Goliath Gantry Crane to take over.

Semi Goliath Cranes

A Semi Goliath Crane is a hybrid design with a combination of EOT Crane and Goliath Crane. One side it is Goliath Crane where the end carriage travels on a rail track mounted on the ground (or at a lower elevation) and another side it is EOT Crane where the end carriage will travel on regular gantry rail mounted on brackets (or at any other higher elevation).

Jib Cranes

Our jib cranes are vital to any production process requiring speed, accuracy, and minimal downtime. Designed for a seamless user experience, they are versatile, durable, and serve almost any kind of workstation, providing support for overhead cranes on production lines, and helping to keep terminals, machining cells, and warehouses operating smoothly. Dedicated jib cranes for a single workstation or group of workstations allow efficient material handling by reducing waiting time for an overhead crane.

Hoists and Monorail System

A monorail crane is a simple and effective lifting solution which consists of a hoist that moves along an elevated beam. Typically found in production environments, assembly lines and many other workplaces, they are ideal for increasing the efficiency of various processes and applications. We supply monorail cranes to both end users and trade clients here in the UK and worldwide.

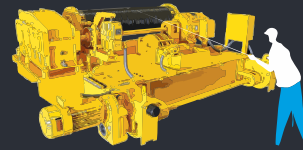

Services

Crane Health Assessment

Our health checkup report, along with recommendations from our technical experts, so don't take risk about your crane it is our responsibility.

Crane Lifecycle Determination

Lifecycle Care is our comprehensive and systematic approach to managing customer assets; connecting data, machines and people to deliver a digitally-enabled customer experience in real time.

Annual Maintenance Contracts

We offers preventive and predictive programs for all types of port cranes, including a full range of spare parts, under a full maintenance agreement. We can take care of your crane as small baby.

Crane Modernization

To modernize the crane often require only digital, mechanical or structural enhancements to increase the equipment's longevity. So we do our best with every part like fit and forget.

Breakdown Services

When it comes to breakdown, our technician and service engineers are not afraid of getting their hands dirty, our quick service is our identity.

Crane up Gradations by Providing Engineering Solutions

Crane capacity up gradation can save over 50% of cost as compared to replacement of existing crane by new. So our moto is optimum utilisation in your crane.

Spare Parts Supply for Various Cranes

We have a large stock of new and overhead crane spare parts. any type of spare part provide just in time is our expertise.

Accessories

Radio Remote Control

Load Cell with Display

Tower Indication lamp

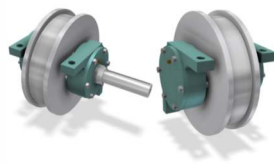

Flasher with Hooter

Spare Parts

ETH Break

L Type Wheel Assembly

Tram wheel Assembly

Conventional Gear Box

Geared Motor

Wire Rope

Chain Hoist

DSL & Accessories

VFD Control Panel

Peldant

DCEM Break

Drag Chain

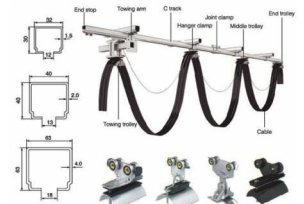

Gravity Limit Switch

Cross Bar Limit Switch

Rotary Limit Switch

Festooned System
